

Women Leading With Love

Women's Circles lead by Donna Placio and Michelle Thompson

We are women committed to bringing the feminine and masculine back into balance our lives, with the express purpose of activating our full aliveness. We provide a sanctuary to support each other in freely, authentically, and powerfully leading with love.

We gather in sacred circles once a month leading discussions on core principles of conscious living, loving and leading. We express ourselves with absolute authenticity and take 100% responsibility for what we are creating in our lives. We actively support each other in coming into alignment with what we most want to create and who we most want to be.

We, Donna and Michelle, provide compassionate coaching and individualized integration practices, while challenging each other and the women of our circles to step unapologetically into the fullest expression of themselves.

Through deep self awareness practices we cultivate unconditional love for ourselves as women and bring that forward to lead with love. In order to cultivate self awareness, we incorporate the wisdom of the Enneagram, a nine-pointed system that explains the nine styles (called types) of relating to yourself, others and the world around you. The Enneagram is a powerful tool for personal and collective transformation that not only provides a remarkably accurate mirror to who you are, but also a pathway toward the healthiest expression of yourself.
